Our vision

A future where every pupil
is able to reach his/her full potential.

Our mission

To empower immigrant communities
through science outreach.

Our work

We connect immigrant pupils with scientists from international backgrounds with the aim to raise aspirations and improve educational outcomes. We go to schools to talk about science in a different language, working alongside teachers to promote multilingualism and science-related careers. Scientists who volunteer have the opportunity to increase the impact of their work through science communication. We liaise with universities, schools, embassies, cultural institutions, trusts and foundations.
